Summary

I leverage my expertise in **analytics** and financial knowledge to transform data into **strategic decisions**. I don't just analyze numbers; I make them tell a story. With training in **machine learning**, **artificial intelligence**, and **data analytics**, I build solutions that not only predict the future but make it more efficient. Because in the world of data, intuition without analysis is just a guess.

Experience

GlobalCobots

Feb 2025 – Present

AI Content Creator & Researcher

- Created **technical content** on **AI**, **data analysis**, and **automation**, improving understanding for diverse audiences and supporting it with research.
- Wrote articles on **AI** and **machine learning**, achieving a **30% increase** in **engagement** and **25% boost** in interaction, alongside **strategic analysis** of trends.

Tools: Python, SQL, Power BI, AI, Machine Learning, Data Analysis, Automation

Academia Postal

Apr 2021 – Dec 2023

Business Intelligence Analyst

- Optimized financial and operational processes using **SQL** and **Power BI**, reducing report generation time by **30%** and improving efficiency by **25%**.
- Managed projects over **€10M** annually, ensuring financial accuracy and compliance through interactive reports and **dashboards**.

Tools: Python, SQL, MySQL, Power BI, DBeaver, Data Visualization, Reporting

Fundación Matrix

Sep 2020 - Mar 2021

Business Analyst

- Developed and tracked financial strategies with **Power BI**, leveraging its **analytics** to reduce budget deviations by **20%**.
- Improved **efficiency** by **15%** and provided **financial insights** for project **viability**, enabling better decision-making and resource allocation.

Tools: Power BI, Financial Analysis, Data Visualization, Reporting

Education

Ironhack

Sep 2024 -Mar 2025

Data Analytics

Bootcamp

- Analyzed data with **Python**, **MySQL**, and **Power BI** to support **strategic decisions**.
- Built **predictive** and **prescriptive models** for **business problem-solving**.

Code Space Academy

Jul 2024 - Sep 2024

Data Science

Bootcamp

- Developed and deployed **machine learning** models for data-driven insights.
- Applied **AI** and **data analysis** to optimize business processes.

University of Vigo

Sep 2012 - Jun 2013

Finance

Master's Degree

University of Vigo

Sep 2005 - Sep 2010

Business Administration

Bachelor's Degree

Projects

Active Mind

Jan 2025 - Mar 2025

Develop an integrated solution for the early detection and management of Alzheimer's disease. Also, an Alexa skill assists both patients and caregivers in daily routines.
